

**TWO SPECIALTY SHOWS
PUPPY SWEEPSTAKES
OBEDIENCE & RALLY TRIALS**

FRIDAY, MAY 18, 2012

The Green Bay Shetland Sheepdog Club shows for this year of 2012 are being dedicated to:

Bob Kuhn

(husband of GBSSC Member Marlene Kuhn)

1952

2005

Bob was a wonderful husband, proud grandfather to 9 girls and 2 boys and 1 great granddaughter. Bob and Marlene were married in 1955.

Bob was very talented in artwork and carving and was a commercial artist by trade. He enjoyed painting landscapes, seascapes, animals and Shelties. He designed logos for several members of the club, as well as, designing and making trophies for several club shows. Bob also drew the club's logo.

He was proud of serving in the Army as an MP, with tours of duty in Korea and Germany. His only wish was for a military graveside service.

Bob did not like attending dog shows, but would build and supply anything the Shelties needed, plus care for them . . . he had a few favorites.

Bob passed away on September 7, 2011. He had several health problems, but his main one was emphysema.

Event #s 2012244901 & 2012244902
Rally Event # 2012244902

JUDGING SCHEDULE

Green Bay Shetland Sheepdog Club, Inc.

FRIDAY, MAY 18, 2012

(unbenched & indoors)

7:00 a.m. to 7:00 p.m. (CDT)

FRIDAY, May 18, 2012 ~ Specialty #2

Event #2012244902 (Specialty & Obedience)

THERE IS A TOTAL OF 29 DOGS AND 34 ENTRIES

Event #2012244903 (Rally)

THERE IS A TOTAL OF 07 DOGS AND 10 ENTRIES

Dogs need not be at show until scheduled time of judging, and they may leave immediately thereafter unless required for further judging.

JUDGES ARE NOT REQUIRED TO WAIT FOR DOGS. THEY WILL ADHERE AS CLOSELY AS POSSIBLE TO THE JUDGING SCHEDULE PRINTED IN THIS CATALOG.

The owner or handler of each dog is solely responsible for having it ready at ringside when its class is to be judged. The show giving club and the secretary have no obligation or responsibility for providing service through a public address system or stewards or runners for the purpose of calling or locating dogs that are brought into the ring when required.

For your convenience, the following divisions of sexes have been carefully tabulated. However, neither the Club, nor the secretary, assumes responsibility for absolute accuracy.

FRIDAY, May 18, 2012 ~ Specialty #1

Offered by Dinah Tippet & Marlene Kuhn (Kankun)

AMERICAN KENNEL CLUB

Schedule of Points for Division #15
Effective May 16, 2012

Division 15 is comprised of: ILLINOIS, MICHIGAN, MINNESOTA, WISCONSIN

The points towards a Championship shall be awarded to Winners Dog and Bitch of each breed or variety of breed based on the actual number of dogs or bitches competing in that breed or variety.

If the dog designated Winners Dog or Winners Bitch is also awarded Best of Breed or Variety, the dogs of BOTH sexes that have been entered for Best of Breed competition and that have been defeated in such competition, shall be counted in addition to the dogs that competed in the regular classes for its sex in calculating championship points.

If the dog designated Winners Dog or Winners Bitch is also awarded Best of Opposite Sex to Best of Breed or Variety, the dogs of his own sex that have been entered for Best of Breed competition and that have been defeated in competition for Best of Opposite Sex, shall be counted in addition to the dogs that competed in the regular classes for its sex in calculating championship points.

After points have been computed for Winners Dog or Winners Bitch subject to the above two stipulations, the dog awarded the Best of Winners shall be credited with the number of points calculated for Winners Dog or Winners Bitch, whichever is greater.

In calculating the number of eligible dogs in competition, a dog that is disqualified, or that is dismissed, excused, or ordered from the ring by the judge, or from which all awards are withheld shall not be included. Any dog which shall have won fifteen points shall become a Champion of Record, if six or more of said points shall have been won at two shows, with a rating of three or more championship points each and under two different judges, and some one or more of the balance of said points shall have been won under some other judge or judges than the two judges referred to above.

AKC Standard for the Shetland Sheepdog

General Appearance

Preamble-- The Shetland Sheepdog, like the Collie, traces to the Border Collie of Scotland, which, transported to the Shetland Islands and crossed with small, intelligent, longhaired breeds, was reduced to miniature proportions. Subsequently crosses were made from time to time with Collies. This breed now bears the same relationship in size and general appearance to the Rough Collie as the Shetland Pony does to some of the larger breeds of horses. Although the resemblance between the Shetland Sheepdog and the Rough Collie is marked, there are differences which may be noted. The Shetland Sheepdog is a small, alert, rough-coated, longhaired working dog. He must be sound, agile and sturdy. The outline should be so symmetrical that no part appears out of proportion to the whole. Dogs should appear masculine; bitches feminine.

Size, Proportion, Substance

The Shetland Sheepdog should stand between 13 and 16 inches at the shoulder. Note: Height is determined by a line perpendicular to the ground from the top of the shoulder blades, the dog standing naturally, with forelegs parallel to line of measurement.

Disqualifications-- Heights below or above the desired size range are to be disqualified from the show ring. In overall appearance, the body should appear moderately long as measured from shoulder joint to ischium (rearmost extremity of the pelvic bone), but much of this length is actually due to the proper angulation and breadth of the shoulder and hindquarter, as the back itself should be comparatively short.

Head

The *head* should be refined and its shape, when viewed from top or side, should be a long, blunt wedge tapering slightly from ears to nose.

Expression-- Contours and chiseling of the head, the shape, set and use of ears, the placement, shape and color of the eyes combine to produce expression. Normally the expression should be alert, gentle, intelligent and questioning. Toward strangers the eyes should show watchfulness and reserve, but no fear.

Eyes medium size with dark, almond-shaped rims, set somewhat obliquely in skull. Color must be dark, with blue or merle eyes permissible in blue merles only. *Faults*-- Light, round, large or too small. Prominent ears. *Ears* small and flexible, placed high, carried three-fourths erect, with tips breaking forward. When in repose the ears fold lengthwise and are thrown back into the frill. *Faults*-- Set too low. Hound, prick, bat, twisted ears. Leather too thick or too thin.

Skull and Muzzle Top of skull should be flat, showing no prominence at nuchal crest (the top of the occiput). Cheeks should be flat and should merge smoothly into a well-rounded muzzle. Skull and muzzle should be of equal length, balance point being inner corner of eye. In profile the top line of skull should parallel the top line of muzzle, but on a higher plane due to the presence of a slight but definite stop. Jaws clean and powerful. The deep, well-developed underjaw, rounded at chin, should extend to base of nostril. *Nose* must be black. *Lips* tight. Upper and lower lips must meet and fit smoothly together all the way around. Teeth level and evenly spaced. Scissors *bite*.

Faults-- Two-angled head. Too prominent stop, or no stop. Overfill below, between, or above eyes. Prominent nuchal crest. Domed skull. Prominent cheekbones. Snipy muzzle. Short, receding, or shallow underjaw, lacking breadth and depth. Overshot or undershot, missing or crooked teeth. Teeth visible when mouth is closed.

Neck, Topline, Body

Neck should be muscular, arched, and of sufficient length to carry the head proudly. *Faults*-- Too short and thick.

Back should be level and strongly muscled. *Chest* should be deep, the brisket reaching to point of elbow. The ribs should be well sprung, but flattened at their lower half to allow free play of the foreleg and shoulder. Abdomen moderately tucked up. *Faults*-- Back too long, too short, swayed or roached. Barrel ribs. Slab-side. Chest narrow and/or too shallow. There should be a slight arch at the loins, and the croup should slope gradually to the rear. The hipbone (pelvis) should be set at a 30-degree angle to the spine. *Faults*-- Croup higher than withers. Croup too straight or too steep.

The *tail* should be sufficiently long so that when it is laid along the back edge of the hind legs the last vertebra will reach the hock joint. Carriage of tail at rest is straight down or in a slight upward curve. When the dog is alert the tail is normally lifted, but it should not be curved forward over the back. *Faults*-- Too short. Twisted at end.

Forequarters

From the withers, the shoulder blades should slope at a 45-degree angle forward and downward to the shoulder joints. At the withers they are separated only by the vertebra, but they must slope outward sufficiently to accommodate the desired spring of rib. The upper arm should join the shoulder blade at as nearly as possible a right angle. Elbow joint should be equidistant from the ground and from the withers. Forelegs straight viewed from all angles, muscular and clean, and of strong bone. Pasterns very strong, sinewy and flexible. Dewclaws may be removed. *Faults*-- Insufficient angulation between shoulder and upper arm. Upper arm too short. Lack of outward slope of shoulders. Loose shoulders. Turning in or out of elbows. Crooked legs. Light bone. *Feet* should be oval and compact with the toes well

arched and fitting tightly together. Pads deep and tough, nails hard and strong. *Faults*-- Feet turning in or out. Splay feet. Hare feet. Cat feet.

Hindquarters

The thigh should be broad and muscular. The thighbone should be set into the pelvis at a right angle corresponding to the angle of the shoulder blade and upper arm. Stifle bones join the thighbone and should be distinctly angled at the stifle joint. The overall length of the stifle should at least equal the length of the thighbone, and preferably should slightly exceed it. Hock joint should be clean-cut, angular, sinewy, with good bone and strong ligamentation. The hock (metatarsus) should be short and straight viewed from all angles. Dewclaws should be removed. *Faults*-- Narrow thighs. Cow-hocks. Hocks turning out. Poorly defined hock joint. *Feet* as in forequarters.

Coat

The coat should be double, the outer coat consisting of long, straight, harsh hair; the undercoat short, furry, and so dense as to give the entire coat its "standoff" quality. The hair on face, tips of ears and feet should be smooth. Mane and frill should be abundant, and particularly impressive in males. The forelegs well feathered, the hind legs heavily so, but smooth below the hock joint. Hair on tail profuse. *Note*: Excess-hair on ears, feet, and on hocks may be trimmed for the show ring. *Faults*-- Coat short or flat, in whole or in part; wavy, curly, soft or silky. Lack of undercoat. Smooth-coated specimens.

Color

Black, blue merle, and sable (ranging from golden through mahogany); marked with varying amounts of white and/or tan. *Faults*-- Rustiness in a black or a blue coat. Washed-out or degenerate colors, such as pale sable and faded blue. Self-color in the case of blue merle, that is, without any merling or mottling and generally appearing as a faded or dilute tri-color. Conspicuous white body spots. Specimens with more than 50 percent white shall be so severely penalized as to effectively eliminate them from competition. *Disqualification*-- Brindle.

Gait

The trotting gait of the Shetland Sheepdog should denote effortless speed and smoothness. There should be no jerkiness, nor stiff, stilted, up-and-down movement. The drive should be from the rear, true and straight, dependent upon correct angulation, musculature, and ligamentation of the entire hindquarter, thus allowing the dog to reach well under his body with his hind foot and propel himself forward. Reach of stride of the foreleg is dependent upon correct angulation, musculature and ligamentation of the forequarters, together with correct width of chest and construction of rib cage. The foot should be lifted only enough to clear the ground as the leg swings forward. Viewed from the front, both forelegs and hindlegs should move forward almost perpendicular to ground at the walk, slanting a little inward at a slow trot, until at a swift trot the feet are brought so far inward toward center line of body that the tracks left show two parallel lines of footprints actually touching a center line at their inner edges. *There should be no crossing of the feet nor throwing of the weight from side to side.*

Faults-- Stiff, short steps, with a choppy, jerky movement. Mincing steps, with a hopping up and down, or a balancing of weight from side to side (often erroneously admired as a "dancing gait" but permissible in young puppies). Lifting of front feet in hackney-like action, resulting in loss of speed and energy. Pacing gait.

Temperament

The Shetland Sheepdog is intensely loyal, affectionate, and responsive to his owner. However, he may be reserved toward strangers but not to the point of showing fear or cringing in the ring. *Faults*-- Shyness, timidity, or nervousness. Stubbornness, snappiness, or ill temper.
